EXPERIENCE

2023– PRESENT

Front End Developer | Cambium Applicable Innovation (a Matrix company)

• **Matriculation Assessment System**
Developed a system using **Angular** to manage matriculation exams for the **Israeli Ministry of Education**. Collaborated with **UI/UX designers via Figma** and implemented features based on detailed **functional specifications**. Worked in an **Agile** environment with **Jira**, and collaborated with QA, backend, and pedagogical teams. Used **AWS CodeCommit** and **GitHub** for version control.

• **Geographic Mapping Tool**
Built a **React** web app for geographic visualization for the **Israeli Ministry of Economy and Industry**. Used **Trello** for task tracking, integrated geospatial data layers, and optimized performance across devices.

2021 – 2023

Software Developer | Sapiens

• **Insurance & Pension Systems**
Developed insurance and pension modules using **eMerge** on **UNIX** and **AS400**, in collaboration with business analysts.

• **Database Development & Troubleshooting**
Developed SQL procedures using **DB2** and **Oracle SQL**. Analyzed and resolved issues reported by QA and end-users to ensure system reliability.
